```javascript
async function startGeneration() {
  const token =
localStorage.getItem("token");
  const prompt =
document.getElementById("prompt-
area").value;

  const res = await fetch("https://
YOUR_BACKEND_URL/api/generate", {
    method: "POST",
    headers: {
      "Content-Type": "application/json",
      "Authorization": token
    },
    body: JSON.stringify({
      prompt,
      duration: videoDuration,
      ratio: "16:9"
    })
  });
```

```
  const data = await res.json();
  document.getElementById("output-
video").src = data.video_url;
}
```
